SUMMARY

Motivated software engineer with internship experience in database management using MySQL at Indian Railways. Skilled in full-stack web development and proficient in cloud management. Published research paper on Blockchain in the healthcare sector. Selected for Associate Software Engineer at Carelon through on-campus placement (2024 batch).

EDUCATION

B.tech , Computer Science Graduated

Noida institute of engineering and technology , June 2024, 8.1 CGPA
Relevant coursework: Cloud Engineer and Programmable Logic, Advanced Full stack Web-Development,proficient with MERN stack.

TECHNICAL SKILLS

Data structure and Algorithms: C++, Java,Python.
Full-stack Web development: Html/Css, Javascript, React, NodeJs,MongoDb.
Database management: MongoDb,SQL.
Certifications: Google Cloud Fundamentals: Core Infrastructure,Essential Google Cloud Infrastructure: Foundation,Elastic Google Cloud Infrastructure: Scaling and Automation.

ACADEMIC PROJECTS

Ad recommendation system

In this project I have made a system which counters the current ad recommendation system. In this project the website URL is scraped and the data is collected from the meta tag of website ,which is then used to classify the category of the website, which allows us to recommend a better ad for the scenario.

- Created dataset which consists of 15L websites
- Made a website classifier using Naïve Bayes algorithm
- Made a recommender using the category classified by the classifier

Developed a Site for Kerela tourism

Leveraged a small project as an opportunity to expand knowledge and skills in web development

- Seized an excellent opportunity to enhance skills in web development, front-end design, and user experience.
- Explored and utilized a wide range of web technologies and frameworks to create an engaging and visually appealing user interface.
- Strengthened knowledge in areas such as HTML, CSS, JavaScript, and responsive design while gaining valuable insights into the latest industry practices.

EXPERIENCE

Indian Railways, Jhansi,India: Database Management Intern Jul 2022 – Aug 2022.

- Database Management Intern at Indian Railways, skilled in optimizing data storage and retrieval, ensuring integrity, and collaborating effectively.
- Strong analytical and problem-solving skills applied to address database challenges. Comprehensive understanding of database management practices with a keen eye for data integrity.

ACTIVITIES

Published research paper on Blockchain in the Healthcare sector.

Gained in-depth knowledge of Blockchain and practically implemented personal blockchain using Python.

- Gave a thesis after closely understanding the Med-rec system presented by engineers at MIT.
- Made a small prototype of hybrid blockchain and designed the system according to the present med-rec system.

Smart India Hackathon (SIH)

Gained hands-on experience on working with a team in a time bounded environment.

- Developed and presented a project.
